INFORMATION LITERACY/INFORMATION FLUENCY Assessment PLANS

2006 2007

Assessment Plan for:　　　　　Information Literacy/Information Fluency

Plan was developed:　　　　　August 21, 2006

The Information Literacy Committee met on this date to discuss and choose the next Information Literacy Project to assess for the academic year 2006 2007. Still using the results from the 2004 Information Literacy Assessment tool and after much discussion the committee chose to ass Question 8 which deals with Boolean Logic. This is going back to emphasizing the basics. The computer literacy exercise results for Computer Literacy Labs 102 and 104 indicate that this is necessary. To assess this question the results from the 2006 2007 Computer Information Literacy Questions will be compared with previous semesters. The ICT Assessment when the results are reported may also be used to compare the results.

Betsey Moylan and Clara Hudson volunteered to work on this comparison and to have the report ready by May 2007 so that it could be included in the Annual 2006/2007 report.
